

**DEPARTMENT OF SERVICES FOR CHILDREN, YOUTH AND THEIR FAMILIES  
DIVISION OF CHILD MENTAL HEALTH SERVICES**

**Criteria for Clinical Case Management Only**

Clinical Case Management is a service provided to children who typically are not currently receiving mental health services funded by DCMHS, and are likely to benefit from clinical oversight and case management by DCMHS. Typically, these youth are in the custody of the Department, are likely to transition to Department custody or services, or are involved in an interagency collaboration.

**Other considerations:**

If only relatively infrequent and intermittent clinical assistance in assessment and/or treatment planning is required, CAS may provide the service.
